

PRODUCT SPECS

Product Code: TI-SSP-PVC-30x60

Size: 300x600mm

Configuration: Hazard

Insert: PVC

Finish: 316 Stainless Steel

Fixing: Drill and Screw

TACTILE INDICATORS - 316 STAINLESS STEEL WITH POLYURETHANE INFILL 300MM x 600MM

- Manufactured from 316 Stainless Steel
- Australian Standards AS1428.1-2009 Compliance
- Beveled edges to reduce trip hazards
- Easy installation

The Enforcer 316 is made of stainless steel with polyurethane infill. It is 300x600mm covering a surface to Prevent slips and falls. Our easy-to-install safety tactile tile can be simply drilled and screwed. This ensures that you can quickly install them without hassle.

Installing the tactile makes building accessible and secure pathways for people with vision impairments. With this tactile tile, tactiles are attached in concentric patterns to a solid plate as a single whole piece and are made of 316 stainless steel on the horizontal face and a smooth outer edge.

This tactile indicators has a high-quality PVC infill, as a slip-resistant material that is designed to withstand inclement weather and foot activity, ensuring they maintain their non-slip quality and durability over time.
