

Tactile Indicator Single Stud - Stainless Steel - Peel & Stick TI-SSS-PS

Description

Enforcers Enforcer Tactile Indicator Single Stud - Stainless Steel - Peel & Stick provides safety and improved accessibility for pedestrians, especially those with visual impairments. The tactile indicators can be grouped to enhance the safety of your workplace or facility and the stainless steel finish can be used indoors and outdoors. Each stud comes embedded with groove lines that provide excellent traction. The anti-slip protection is compliant with Australian Standards AS/NZS 1428.4:2009. It also resists weathering and corrosion making it suitable for both indoor and outdoor use in challenging weather.

Features

- Made from stainless steel.
- Slip resistant design with R12 slip rating.
- Concentric ring top provides excellent traction.
- Quick and simple installation using peel-and-stick backing.
- AS1428.1-2009 standards compliant.
