

Tactile Indicator Single Stud - Stainless Steel, 10 rings

TI-SSS

Description

Enforcer Tactile Indicator Single Stud in Stainless Steel can be used to create safe boundaries around trip and fall hazards in areas like train station platforms, loading docks, wharfs and carparks. The studs can be used to guide visually impaired people safely around hazardous areas by indicating a boundary has been reached. The studs also provide an extra layer of safety by providing extra grip to smooth surfaces. They are durable enough for outside use.

Features

- Made from stainless steel.
- Slip resistant design with R12 slip rating.
- Easy installation with pressure fit design.
- AS1428.1-2009 standards compliant.
