

Tactile Template 1200x600

TI-TT-12X6

Description

Enforcers Tactile Template 1200x600 is a useful tool for marking out the precise positioning of tactile studs for installation onto pavements and other surfaces. It ensures the tactile studs are positioned at the prescribed spacing and removes the need for time consuming measuring and repositioning. It can be cut to size to suit the requirements of your project. Tactile indicators can be used to improve the safety of car parks, stairways, foot paths, pedestrian crossings and other areas.

Features

- Stainless steel construction for durability and corrosion resistance.
- Precise template for accurate tactile stud positioning.
- Lightweight and easy to handle.
- Can be cut to suit project requirements.
- Suitable for repeated installation use
