

Enforcer Water Filled Barrier - Orange

WFB-O

Description

The Enforcer Water-Filled Barrier – Orange is a robust and highly visible temporary safety barrier designed to provide effective traffic management, pedestrian control, and worksite protection. Engineered for maximum stability, the barrier can be filled with water for added weight, making it ideal for both indoor and outdoor applications. Its bright orange finish ensures excellent visibility, helping improve safety in construction zones, roadworks, events, and commercial environments.

Features

- Durable, UV-stabilised polyethylene construction for long-lasting outdoor performance.
- Water-fillable design provides increased stability during use.
- Interlocking connection system allows multiple barriers to be securely joined.
- High-visibility orange finishes for improved site awareness.
- Integrated carry handles for easy handling and positioning.
- Lightweight when empty for convenient transport, storage, and deployment.
- Suitable for traffic management, pedestrian control, work zones, and exclusion areas.

Specifications
