

Enforcer Water-Filled Barrier - White

WFB-W

Description

The Enforcer Water-Filled Barrier – White is a durable, high-visibility temporary safety barrier designed for effective traffic management, pedestrian control, and worksite protection. Manufactured from heavy-duty, UV-stabilised polyethylene, the barrier can be filled with water to provide enhanced stability while remaining lightweight for transport when empty. Its clean white finish offers excellent visibility and is ideal for roadworks, construction sites, events, commercial facilities, and public spaces.

Features

- Durable, UV-stabilised polyethylene construction for long-lasting outdoor performance.
- Water-fillable design provides increased stability during use.
- Interlocking connection system allows multiple barriers to be securely joined.
- Integrated carry handles for easy handling and positioning.
- Lightweight when empty for convenient transport, storage, and deployment.
- Suitable for traffic management, pedestrian control, work zones, and exclusion areas.

Specifications

SKU	WFB-W
Length	2000 mm
Top Width	160 mm
Width	500 mm
Height	900 mm
Weight Empty	20 kg
Maximum Water Capacity	300 kg
Material	HDPE
Colour	White
Warranty	12 Months
